

Adapter from an FMI 2.0 Co-Simulation FMU to the CoSimComponent contract.

C FMUComponent

+name: str
-_path: str
-_md: ModelDescription
-_instance: FMU2Slave
+direct_feedthrough

+set_inputs(signals, t)
+get_outputs()
+get_state() / set_state(state, t)

#_initialize_component(t0)
#_do_step_internal(t, dt)
#_update_output_states(t)
+evaluate_outputs(inputs, t)

A CoSimComponent

+initialize(t0)
+do_step(t, dt)
+evaluate_outputs(inputs, t)

#_initialize_component(t0)
#_do_step_internal(t, dt)
#_update_output_states(t)

C «fmpy»
ModelDescription

+modelVariables
+coSimulation
+outputs (ModelStructure)

Source of ports, parameters, units, value references, and direct-feedthrough dependencies.
